EPA 2023 (PFOS, PFOA) RfD Selection

As described in the subsections below, EPA selected amongst the candidate RfDs to identify an RfD representative of each of the four prioritized health outcomes (i.e., health outcome-specific RfDs), as well as an overall RfD that is protective of the effects of PFOS, PFOA on all health outcomes and endpoints (Figure 4-4, Figure 4-5).
